Y.P.S. Fall Rally.

It's fall—and with fall we naturally think about Young People's organizations. The Crossfield Y.P. Society is holding its Fall Rally on Sunday evening, October 16th, at 7:30 p.m. in the United Church. Will you try to be there?

The guest speaker will be Miss Audrey Freeze, of Calgary, who will give us the highlights of the White by Conference. She will be accom-

Hallowe'en Party.

The Young People's Society is holding a Hallowe'en party in the Masonic Hall on Monday, October 31st, at 8 p.m. Everybody is invited.

An organization meeting will be held during the party.

panied by Bert Pettigrew, the President of the Alberta Y.P. Executive. A very pleasant time is assured everyone. Social hour after.

WILDA LAUT, President.

Early Closing

After Harvest

Now that the harvest season is over, the Wednesday half-holiday will be enforced, and stores will again close at 6:30 p.m. and 1 o'clock at noon Wednesdays.

By Order of the Village Council.

Home is Destroyed.

The following is an article sent to us by Mr. A. R. Irkin, of Westholme, B.C. a former resident of Crossfield.

BURNABY, B.C., Oct. 3—Fire destroyed the home of A. K. McLean, former reeve of this suburban Vancouver municipality, early today, causing damage estimated at \$4,000. McLean and his wife, awakened by the fire, escaped uninjured.

Mr. McLean was a former Crossfield and District resident.

Local Dramatic Society

Prepares For Winter

At a meeting of the Crossfield Dramatic Society, which was held in the C.D.S. rooms Thursday last, a cast was selected for a play to be held the latter part of November. This play promises to be a real laugh producer.

The society got away to a good start and a full programme of subjects is outlined. One night per month has been set aside for recreation.

The C.D.S. anticipates a full winter's enjoyment. So any who wish to join should do so without delay, and so participate in all the activities of the season.

United Church Greet

Rev. D.H. Telfer, M.A., B.D.

Complimenting the anniversary preacher by combining the services for the day, the United Church people will gather at 3:00 p.m., in Crossfield, on Sunday, October 16, to welcome to their pulpit the Rev. D. H. Telfer of Wesley United Church, Calgary.

A large crowd is expected to celebrate the 33rd anniversary of the erection of their church home.

Monthly Meeting of Local School Board

The regular meeting of the Crossfield School Board was held on Thursday last, October 6th.

In grade 12 seven of the pupils are taking an advanced course in chemistry, the practical part of which Mr. Gish, principal of the school, has arranged to be taken at the Carstairs school, as the Crossfield school has not the necessary facilities and chemical supplies for this advanced course.

The pupils taking this course pay the Carstairs teacher the sum of \$50 for the full school term. Apart from this fee, each pupil pays \$5 for the use of the chemicals.

In making these arrangements it has saved the school board an outlay of at least \$600 for equipment necessary to teach this particular subject.

For the transportation to Carstairs each week, Mr. F. T. Baker, chairman of the board, has kindly offered to donate the gasoline and Rev. Hunt is giving the services of his car free of charge.

Since the opening of the new school term, owing to an increase of high school pupils, it has been necessary to install eight new desks.

The Board has decided to extend the 10 percent discount on taxes until the end of this month, which is a great saving and should be taken advantage of.

The remainder of the business was of a routine nature.

Shopping Week

Prize Winners

Saturday evening last, told the tale of the prizewinners during the shopping days, sponsored by the Crossfield merchants.

M. N. Jones was all smiles when he discovered his ticket had been drawn for the grand "chime clock." This was for cash sales, and the lucky number was 017776.

C. E. Richardson won the blankets, for money paid on account, with ticket number 136713.

In the Chronicle Missing Letter Contest, J. M. Huston, the new agent for the United Grain Growers receives the subscription to the Chronicle for one year and Miss Kathleen Fitzpatrick receives the stationery.

Bishop and Mrs. Sherman

Attend Ladies Guild Tea

In spite of the bad roads and rather a cool day, many attended a most successful tea, held under the auspices of the Anglican Ladies Guild.

Among those noted from outside the town were Bishop and Mrs. Sherman, Mrs. N. J. Wigle, Mr. and Mrs. Allan Montgomery and Miss Montgomery, Mrs. S. Walker and Mrs. M. Thomas. About 33 in all called.

Mrs. D. H. McFadyen poured tea and Mrs. H. J. Reeves was treasurer for the afternoon.

Wedding.

WALROTH—MAYBE

A quiet wedding was solemnized at the United Church manse, Bowden, when Miss Violet Patricia Maybe, of Calgary, became the bride of Mr. Ted Walroth, second son of Mr. and Mrs. W. I. Walroth, Crossfield. The Rev. Rolfs performed the ceremony. The bride was attired in a pink figured gown, pink hat and white shoes, and carried a bouquet of carnations, sweet peas and gladioli.

Confetti played a big part here, and, with tin cans dangling on behind, the happy couple motored to Olds where a reception was held in the Public Lunch. Twelve guests including the Rev. and Mrs. Rolfs, were present.

The bride chose a brown tunic for travelling, and after a short honeymoon at Calgary, Mr. and Mrs. Walroth will reside at Bowden.

To Shareholders Of Crossfield Mutual Telephone Company

The Board of Directors of the Crossfield Mutual Telephone Company would appreciate settlement of all outstanding accounts by October 15th.

The World of Wheat

By H. G. L. Strange

Sometimes ago our Research Department compiled and published a chart showing 538 years of wheat prices.

The chart revealed a number of severe rises and falls in price throughout the years. We found that these great fluctuations always coincided exactly with great wars.

We therefore set about studying all the wars that had occurred for the same period. I. e. the last 538 years; and we found some amazing things.

That the world during 538 years has only been at complete peace for 51 years. That France has been at war during the period 300 years; Russia 261 years; Austria 238 years; Great Britain 222 years; Spain 213 years; Turkey 192 years; Germany 187 years; Italy 117 years; Holland 106 years; Portugal 40 years; and the United States 27 years. The most peaceful country having been China.

Most of the wars were fought, we found, to obtain possession of lands that produce wheat, foodstuffs or other raw materials. Then, later, other countries would arise and attempt to take these lands for themselves from those who had previously conquered them; and so it seems to have gone on and on throughout the ages.

One invariable result of war has

ever been, first very high, and then very low wheat prices.

"These Registered and Certified seed growers seem to ask a pretty high premium for their seed. Isn't there some way to get it cheaper?" a friend asked me last week.

"The seed is well worth the price asked," I told him. "It takes a lot of extra expense and care to grow Registered and Certified seed, but," I said, "If you don't want to pay the seed grower for doing the extra work, why not do it yourself and so save money?"

"How?", he asked.

"Lay down a seed field on your farm," I advised. "Choose five or ten acres of your very best summer-fallow, and then buy only a few bushels of the best Registered or Certified seed, and sow it on this small field, leaving an alleyway bare all around it. Protect the field, rogue it, harvest, thresh and special bin the grain with care, and then by next year you will have enough seed for a large acreage."

"Oh," answered my friend, "that's a lot of trouble though, isn't it?"

"Well," I ventured to say, "That's life all over, either we must go to extra trouble ourselves to produce an extra good thing, or pay some one else to do it for us."

Says Farmer "Clear Thinker":

"I KNOW WHERE MY GRAIN SHOULD GO--

"To the organization that fought for the grain farmers through thick and thin."

BIG BEN

The PERFECT Chewing Tobacco

More Health In Bread

The fact that the hitherto discarded embryo of the wheat kernel contains enormous nutritive value might well be used to advantage in promoting the more extensive use of the major bread cereal in this country, provided the millers can be persuaded to reform their manufacturing methods to ensure that the full value of the grain is passed on to the consuming public.

By eliminating the embryo from the milled product millers have been able to produce a flour which yields a presumably very fine white loaf, extremely attractive in appearance, and therefore readily saleable among the public.

Unfortunately, however, the desire to present to the public a white loaf of seeming beauty has resulted in the sacrifice of some of the wheat's most healthful ingredients and substances essential to the support of a well balanced diet.

When one considers the substantial percentage of the nation's bulk food formed by bread the enormous loss to the consumer represented in the rejection of its most nutritive ingredients is more than unfortunate. It might more properly be termed a calamity.

A Stimulant To Consumption

Doctors and dietitians have known of the health value of whole wheat flour for some considerable time and almost daily one reads of the advocacy by prominent members of the medical profession and medical writers of the use of whole wheat bread as a health measure and as a corrective for certain forms of indigestion and weakening teeth.

It is only comparatively recently, however, that the full extent of the worth of whole wheat bread as a builder of a sound human frame has been determined by scientific and analytical processes as well as by the results of practical experimentation on the human constitution.

These scientific discoveries show that the embryo, or germ, of the wheat kernel is rich in vitamins A and B, E and G, all of them of great value in building up the human body and all playing their part in preserving it in a healthful condition; yet these valuable constituents, under present methods of manufacturing flour are treated as offal and thrown into the discard.

That the consuming public is not yet fully awakened to the loss it is sustaining as a result of existing milling practices is quite evident; otherwise there would be an insistent demand for bread made from whole wheat flour. When consumers recognize the value in terms of health represented in bread baked from flour containing the entire germ, no doubt the miller will accede to public requisition without raising any objection, and the knowledge that the bread they then get is doing much to promote their health should stimulate the public to increase its consumption of bread.

A Worthwhile Study

Commenting upon these discoveries the Western Retailer in an article in its September issue printed some remarks well worthy of study when it said:

"It is high time that the Canadian Government, the milling interests and bakers joined together, to give the Canadian public the real facts about the food value of wheat. Especially is this true in view of the fact that every advance in knowledge that has been made by science in the last thirty years has tended to show that one of the richest sources of needful vitamins (which are now becoming better understood) is the embryo of the wheat berry.

"The first baker to show the public a loaf of bread in which the full value of the embryo has been retained should receive the grateful thanks of the wheat farmer, the grain interests and every public servant whose interest is maintaining public health."

Education Needed

Those who are fortunate enough to be able to get bread baked from genuine whole wheat flour are well aware that the loaf thus produced is darker in appearance than the bread produced by "sterilized" white flour and the baker who produces such a loaf is not likely to get all the thanks he deserves, unless the public is prepared to accept his product.

In other words what is required is a program of public education on the virtues of whole wheat bread as the first step towards creating the necessary demand. Should the governments decide upon such a program, there is little doubt that they would receive the hearty support of the medical profession and of all those who are now aware of the health value of the wheat germ.

The economic importance of such a program should not be overlooked either, for a realization of the value of bread to health would naturally be followed by an increased consumption and bread would, in actual fact, again become the staff of life—and health.

A Conductor's Privilege

The question of whether a conductor can jump aboard his moving bus has been settled in magistrate's court at Georgetown, British Columbia. Conductor Albert Manowar was charged under a traffic ordinance with boarding the moving vehicle. The magistrate acquitted him, ruling the conductor had the "lawful authority" to do so.

Where Bear Belongs

The Buffalo Courier-Express says if the German people appear apathetic to the impending shadow of war, it might be due to the difficulties of expressing one's fears openly in a country where there are suspiciously broken up as a crowd, police attend every social get-together and even the woods have diaphanous cars.

Amsterdam has a river called "Y", China has a city called "U", and Sweden has a town called "A".

Has Nice Little Job

Charles Smith, head keeper of the San Diego Zoo, has a neat little job on his hands—driving two giraffes from New York to California in a truck. Giraffes are regarded as the hardest of all animals to transport, and it is the first time a transcontinental shipment will be tried by truck. The giraffes are coming in from Africa on a freighter.

Trench Revealed Coal

One Leeds resident reaped a neat little profit from England's mid-winter war scare. The last five feet of a nine-foot trench Henry Varley dug to shelter his family from air raids turned out to coal. He shovelled out two tons and there was no sign the seam was near exhaustion.

A crow with pure white wings has just been seen in Scotland.

There are 200 distinct bones in the human body.

Compulsory In France

Children Barred From Schools Unless Immunized Against Diphtheria

In France immunization against diphtheria has for some time been obligatory for soldiers. During the present year the provision has been extended to include all school children. All children are required to be immunized against diphtheria in the first or second year of life. No child can be admitted to school without a certificate showing that this law has been complied with. All school children up to the age of 14 years, who have not been previously protected against diphtheria must submit to immunization as soon as possible after notice has been given in the official gazette. This announcement appeared on June 3rd. The Toxoid administrations are free. It is said that any necessary outlay will be amply compensated by a marked reduction in the present mortality from diphtheria of 2,000 deaths and of over 20,000 cases annually.

In Canada, we attempt to gain the same results by education of the public as to the value of the protection afforded by immunization against diphtheria. The results have been gratifying. Whole communities where the little children have received doses of Toxoid have for years remained immune to diphtheria. The work is rapidly extending year by year. Soon, through the effect of voluntary immunization Canada will be rid of this dangerous malady.

All children have Toxoid as soon after they are six months of age as possible. The great mortality for diphtheria has been in children under the age of five, although children of all ages contract the disease. Do not neglect the use of Toxoid—your health officer or your family doctor will arrange it for you.

Timely Information

Trans-Canada Air Lines Gives Regulations For Baggage

According to Trans-Canada Air Lines, this is what the well-dressed woman can carry with her on a flying trip without exceeding the excess baggage regulations: "Suit case 21½ inches by 16½ inches by nine inches; two street dresses; 12 handkerchiefs; jacket; one pair of sandals; evening gown and bag; four pair gloves; six pair hosiery; lightweight dressing gown; one pair mules; nightgown; jewelry case; sewing kit, rubberized toilet kit with cosmetics in lightweight containers. All this, according to T.C.A., officials who claim to be versed in such matters, weighs three pounds less than the maximum 35 pounds of baggage allowed each passenger without charge. Furthermore, they state a woman can exist for six weeks with such an outfit. Men, they complain, are forever carrying too much luggage and are always a problem to air line baggage masters.

Cats Live In Luxury

Nothing Too Good For Six Pets Of English Woman

In nine-roomed house overlooking the sea at Barton, ten miles from Bournemouth, England, six cats live in the lap of luxury.

Each has its own room, bed and dishes, and a housekeeper is employed to look after their every want. Four times a week a taxi from Bournemouth brings their food—the best steak, fish, rabbits, milk and cream.

The cats are the property of Mrs. Agnes Burrell of Bournemouth. Originally she had only one cat, but so she captivated Mrs. Burrell, a childless widow, that she became the extraordinary lover of cats that she is to-day. They are her main interest in life and nothing is too good for them.

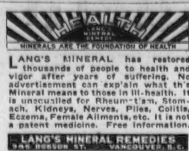

More Modern Setting

Horses Of R.C.M.P. Giving Place To Cars

That picture of the Royal Canadian Mounted Police officer, astride his faithful steed, scanning the prairie stretches with hand upraised to hat brim against the rays of the setting sun, a favorite of artists, magazine readers and movie fans, is giving place in real life to more modern settings. Soon the northern constable, on patrol, will be peering from the window of a speeding automobile. And, according to recent announcements, prairie detachments will be listening for the voice of the wireless "calling all cars."—Edmonton Journal.

What is this isolation of which we talk, with steamships making the Atlantic crossing in less than four days and airships covering the distance from New York to Berlin in 20 hours?

There are more than 25,000 taxicabs in New York City.

Built Up Good Business

Hollanders Sold Bulbs For High Prices To Wealthy Americans

John Theodore Scheepers, premier agent in this country for the Holland bulb industry, who made himself rich by selling bulbs to wealthy persons at higher prices than his competitors demanded, died of heart disease in New York.

Mr. Scheepers was able to command high prices for his bulbs largely because he emphasized the esthetic and deprecatable commercialism when dealing with his well-to-do customers. He idealized the flower for which his native Holland is famous and injected a new technique into bulb salesmanship. As a result, he sold some of his tulips for \$500 each and rare daffodils at \$250 a bulb. Some of his bills for large plantings on Long Island estates ran as high as \$50,000.

In 1932 he was knighted by Queen Wilhelmina in the Order of Orange-Nassau. He conducted "garden lovers' pilgrimages" to Holland in 1935 and 1936.

Not long before his death he provided 1,000,000 flower bulbs for planting in the grounds of the New York World's Fair 1939.

In 1911 he started his own business, selling tulips to greenhouses. In later life he looked upon those two years with distaste because of their excessive commercialism. When dealing subsequently with his wealthy private customers about the only commercial note that entered the negotiations was when he sent around his bill.

At the suggestion of a friend he gave up selling to greenhouses and began catering to amateur gardeners. He went up to Newport, R.I., in a second-hand Ford and there the first friend he made was Mrs. Ellen Franch Vanderbilt. She paid him \$1,000 for a small collection of bulbs. She told her friends where they could buy the bulbs and when he left Newport he had \$50,000 in orders. His clientele of select customers grew steadily. His competitors told him to understand how he could outsell them at such high prices. His customers were buying esthetic delights and old-world fantasies in blossoms instead of just tulips. He even charged \$3 a bulb for his catalogue while his competitors were furnishing theirs free.

Sometimes, however, customers were enraged by the bills. One man was so indignant that he dug up the bulbs and sent them back. Another refused to pay a bill of \$50,000. Mr. Scheepers sued him and the case was settled out of court for \$30,000.

An Interesting Conference

Collective Security

Justice In The End Is Sure To Prevail

The phrase "collective security" has come to have a bitter taste in the mouths of many. Yet in the long run there is no choice between collective security and ruin. In the long run the lives and property of peaceable, non-offending men and women of peaceable, non-offending nations will be made safe or civilization will die. And it will not die. It is a far tougher organism than those who assail it and those who betray it are willing to believe. It has come out of pain and sweat and sacrifice. It has come out of the minds and hearts of men and women turning away from ease and softness to do hard tasks. It has come out of hopes and dreams and visions. It has been defended on battlefields and on sinking ships and in the narrow room of poverty. Those who have built it, those who now sustain it—the humble and obscure as well as the powerful—are slow to anger, but like the mills of God, when once aroused they grind exceeding small. They can be driven back and defeated for a day, a week, a year, but not forever. There is a justice in the world, cherishing in men's hearts, and let there be no doubt of it—in the end it will prevail.—N.Y. Times.

A boy at school, when asked to describe a kitten, said:

"A kitten is a little bundle of fur that rushes like mad at nothing whatever—and stops before it gets there."

Swain (in late hours): "How can I ever leave you?"

Tired Father (poking his head around the door): "Bus No. 75, Train No. 40, or any taxicab!"

Rewarded For Kindness

Ballet Dancer And Hospital Attendant Receive Large Fortune

It's a story strange as fiction with a typical surprise ending—this true-life tale of how a former assistant theatre manager and a ballet dancer were kind to an eccentric old woman and reaped an estimated \$1,000,000 reward.

The woman was 70-year-old Mrs. Edna Morse Allen Elliott, a quiet haunter of film houses who became known as "New York's Champion Movie Fan".

A feminine hermit, she died friendless and alone in her three-story brownstone house in West 88th street. Her will disclosed she had left securities and \$80,000 in jewels to Rosalie Spatcher, a ballet dancer, and the residue to William Reilly, former assistant manager of the Roxy Theatre. They had "helped to make the recent years of my life more pleasant," Mrs. Elliott wrote in her will.

Reilly, whose sudden wealth lifted him from a \$52-a-month hospital attendant's post, said attorneys told him the estate was valued at \$1,000,000.

He said when he first met Mrs. Elliott in 1927 he thought she was poor—she wore old-fashioned dresses with leg o'mutton sleeves—and arranged for her to have a front row seat every Thursday when the theatre changed its program. Afterward he would discuss the show with her briefly.

The theatre closed temporarily in 1932 and Reilly lost his job. He never saw Mrs. Elliott again.

She then began attending Radio City Music Hall and during rehearsals Miss Spatcher often walked over to chat with the lonely old woman in the front row seat. She never knew Mrs. Elliott's identity or saw her outside the theatre.

It was some time before Reilly learned of his fortune. He said he had dodged Mrs. Elliott's lawyers for several days—thinking they were trying to serve him with a summons.

SELECTED RECIPES

CALUMET SUGAR COOKIES

2½ cups sifted flour
1½ cups Calumet Baking Powder
1½ teaspoon salt
1½ teaspoon nutmeg
1½ teaspoons grated lemon rind
½ cup butter or other shortening
½ cup sugar
2 eggs, well beaten
Sift flour, nutmeg, salt and baking powder, salt, and nutmeg, and sift again. Add lemon rind to butter and mix thoroughly. Add sugar gradually, and cream together well. Add eggs and cream, and beat thoroughly. Roll out four gradually mixing well. Chill until firm enough to roll. Roll ¼ inch thick on slightly oiled surface. Cut with flour 3-inch cutter and sprinkle with sugar. Bake on ungreased baking sheet at 350° F. for 10 minutes, or until done. Makes 2½ dozen cookies. Cookies may be cut in fancy shapes and frosted or decorated with colored candies, sugar, citron, nuts, and candied cherries. They are especially suitable for children's parties or for holiday entertaining.

PUMPKIN PIE

2 cups cooked pumpkin
½ cup Bee Hive Golden or White Corn Syrup
¼ cup white sugar
2 eggs
1 teaspoon St. Lawrence or Dur-ham Corn Starch
1½ teaspoon cinnamon
1½ teaspoon ginger
1½ teaspoon salt
1½ cups milk
1 teaspoon St. Lawrence or Durham Corn Starch
Beat eggs light and add to pumpkin already mixed with syrup, sugar and spices. Blend corn starch with milk and add. Mix all thoroughly and pour into deep pie plate lined with good pastry. Bake in hot oven 450 degrees F. for 10 minutes, then reduce until filling set, in all about 30-35 minutes. Serve with whipped cream.

Considered World Record

Way In Which Britain Has Eliminated Slum Houses

The Municipal Journal, London, says nearly one thousand persons are being moved every day in Great Britain from slum houses to new and decent dwellings.

To-day's one-third of the population are living in post-war houses. Since the end of the war over three and a half million new houses have been provided in England and Wales, and of these more than a million have been built by local authorities.

What other country can show such a record in this sphere of social improvement?

A pair of moose antlers in the Chicago Field Museum measure 77½ inches across and are said to be the world's largest.

A giraffe has only seven vertebrae—one-half as many as a hummingbird.

EASE

of Rheumatism Neuritis Neuralgia Quickly

SIMPLY GET "ASPIRIN"—FOLLOW EASY DIRECTIONS BELOW

1. Take 2 "Aspirin". 2. You should feel better with a full relief very quickly. If after 15 minutes you still feel worse, repeat another 2 "Aspirin" or cooling directions.

To relieve pain of rheumatism or neuritis quickly, try the "Aspirin" way—shown above.

People everywhere say results are remarkable. "Aspirin" Tablets are economical, which makes the use of expensive "pain remedies" unnecessary. If this way fails, see your doctor. He will find the cause and correct it. While there, ask him about taking "Aspirin" to relieve these pains. We believe he will tell you there is no more effective, more dependable way normal persons may use.

TRADE MARK REG.

Royal Research Ship

Britain's Magnetic Survey Vessel Will Fly White Ensign

The magnetic survey vessel Research will be ready for launching in February in England, and is to be put into service in the autumn of next year. She is being built at the cost of the navy estimates, but she is not to be described as "H.M.S." her functions being purely civilian and scientific. At the same time the King has ordered that she be described as "Royal Research Ship", and she will fly the White Ensign.

No Tickets Fixed

Policeman Donald Galbreath of Portland, Oregon, has a fine time these days just laughing at friends who want him to "fix" their traffic tags. Galbreath recently paid \$13 for traffic tags and towing charges on his automobile after it was towed to the police garage because of illegal parking.

The banyan tree of the East Indies sends down new roots from its branches. These become auxiliary trunks and allow the tree to grow over a large area of ground.

HOW YOU CAN ATTRACT MEN

Of course, you have no men friends yet. You're just a lonely, dull, cross, and nervous. Men like lively, peppy girls—who play plenty for fun. Don't let love and romance pass you by. Help build up your pep and you, too, should have gay friends. Here's good advice: Start taking time-proven, reliable Lydia E. Pinkham's Vegetable Compound and note the difference. This famous Compound, made especially for women from wholesome herbs and roots, helps Nature tone up your system and gives you more pep to really enjoy life.

Try out this notice NOW as a reminder to get a bottle of Lydia E. Pinkham's Vegetable Compound TO-DAY without fail.

For over 50 years a woman has told another how to get "smiling thru" distress from female functional disorders with Pinkham's Compound. Let it help YOU.

For over 50 years a woman has told another how to get "smiling thru" distress from female functional disorders with Pinkham's Compound. Let it help YOU.

SECURE DATA ON FAMILY BUDGETS ACROSS CANADA

Ottawa.—Field agents of the bureau of statistics this week in 12 Canadian cities started gathering data from specially selected families as to weekly expenditures on food, clothing and other costs which enter into the family budget. Dr. R. H. Coats, Dominion statistician, announced 85 or 90 field agents were at work.

Surveys are being made in Charlottetown, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, London, Winnipeg, Saskatoon, Edmonton and Vancouver. Data from 5,000 families will be available the end of October.

The survey is part of a world-wide movement to get actual statistics concerning nutrition and the ordinary rations of the ordinary family—leading to whether the family income is adequate to provide proper nourishment and other necessities.

Last session parliament voted \$25,000 for the undertaking. The results will be submitted to the Canadian council on nutrition.

For months experts from the health department, national research council, agricultural and labor departments have been preparing for the survey, deciding on the questions to be asked the housewives, the type of families to be selected for study, the period for which data would be gathered.

Typical families with incomes of \$2,500 a year and less were decided upon. Families of French-Canadians, Anglo-Saxons and other racial origins will be studied separately.

Supervisors were named in each city to organize the survey. They had to engage field agents. For the most part these are social service workers accustomed to visiting homes. Families selected are under no obligation to co-operate. They can order the agent out of their houses if they wish.

This week 5,000 housewives have begun entering each day what they spend on bread, on meat, on milk and so on. Meals taken downtown have to be entered, as well as expenditure on candy, ice cream and drink outside the house.

The agriculture department has been brought into the undertaking because it is believed the information will enable it to advise the farmers and distributors of farm produce in what lines the domestic consumption could be increased and in what lines present consumption is sufficient.

Trans-Canada Airlines

Expected That Service Should Be Self-Sustaining

Montreal.—Once operating on a regular schedule basis with reasonable mail contracts and normal passenger traffic, Trans-Canada Airlines should be "self-sustaining if kept small and flexible," Philip G. Johnson, operating vice-president, said.

Mr. Johnson told reporters he could not set a definite date for starting of regular service on the transcontinental line. Pilots and ground personnel were still engaged in experimental flights between Montreal and Winnipeg and Winnipeg and the west coast.

Aeroplane skis will not be used. When snow comes, the landing fields will be kept well rolled so big planes can land safely on wheels.

Passenger flights will come first on the western division across the prairies and the Rockies, the vice-president said. Passenger tariff schedules were in course of preparation on a basic rate of about six cents a mile, roughly a little more than rail fare plus Pullman rates.

Trans-Canada Airlines, he pointed out, were required by law to provide rates comparable with those on competing lines on the United States transcontinental routes and other competitors.

Service from Montreal to the maritime provinces would be deferred at least until 1939.

Receives Appointment

Ottawa.—A. J. Darbey, former poultry fieldman in Saskatchewan, has been appointed senior poultry fieldman in the Dominion department of agriculture, it was announced. He will act as chief assistant in the administration of the poultry production service with particular jurisdiction in the record of performance and hatchery approval work.

The summit of Mount Everest, highest point of land in the world, would be one and one-fifth miles under water if placed in the deepest part of the ocean.

Lord Shaughnessy

Son Of Late Chairman Of Canadian Pacific Railway, Dies In Montreal

Montreal.—Lord Shaughnessy, son of the first Baron Shaughnessy, late chairman of Canadian Pacific Railway Company, died in hospital of double pneumonia. He was 55.

The younger Shaughnessy was born in Montreal, Sept. 29, 1883, and received his early education at Bishop's college school at Lennoxville, Que., later attending McGill University and Laval University in Montreal and Trinity College, Cambridge, England.

On completion of his studies in 1910 he entered the law firm of Meredith, Macpherson, Hague and Holden, becoming a partner in 1912. Eight years later he was appointed king's counsel.

As adjutant he went overseas with the Irish Canadian Rangers and was transferred in France to general headquarters, Canadian section, and later served as aide-de-camp to the late General Sir Arthur Currie.

In 1920 the Canadian Irish Rangers were amalgamated with the 189th Irish Canadian Rangers and adjutant Shaughnessy took command in the rank of lieutenant-colonel.

In addition to his law practice, Lord Shaughnessy was associated with a number of financial houses and served as director of the C.P.R. and West Kootenay Power and Light Company.

Survivors include three daughters and one son. His wife, Marian Laura Graham, niece of the late Lord Atholstan, died several years ago.

Proposes Home For Eskimos

Aged Members Described By Tribes

Ottawa.—Members of the Northwest Territories Council have received a proposal from Rt. Rev. A. L. Fleming, Anglican bishop of the Arctic, that the Dominion government contribute to the building of a home for aged Eskimos at Pangnirtung, Baffin Island, 30 miles south of the Arctic circle. The proposal has not yet been considered by the council, a group of government officials who administer the Territories.

Bishop Fleming mentioned the need for such a home in a sermon to the congregation of St. Paul's church in Toronto recently. He described the custom of pagan Eskimos deserting aged members of the tribes "appalling."

Camps For Jobless

British Columbia Is Planning To Care For Single Men

Victoria.—Camps to provide work for homeless single unemployed in British Columbia will be opened again this winter, it was announced by Hon. George S. Pearson. The provincial minister of labor said an arrangement "somewhat along the same lines as last year" would be made with the federal government to care for single men.

Mr. Pearson has just returned from Ottawa where he discussed the problem with Hon. Norman Rogers, federal labor minister.

He said the agreement between the two governments covering the scheme has not yet been signed but will be when several unsettled details are decided.

Soviet Russia's Stand

British Government Remains Calm Over Franco-Russia Treaty Break

London.—British government circles remained unperturbed at Soviet Russia's indication she will denounce the Franco-Soviet treaty.

Some circles favorable to the government welcomed the move as removing a barrier in the way of concluding a four-power western European pact. These circles have privately advocated cancellation of the Franco-Soviet pact for some time.

The indication from Moscow that Soviet Russia regards France as without an ally in Europe except Great Britain struck gloom into the hearts of anti-government elements. They feared it was a sign that London and Paris were now condemned to face greater Germany alone should the fuhrer ever decide to turn back west.

Honorary Degree

Toronto.—Lady Tweedsmuir, wife of Lord Tweedsmuir, governor-general of Canada, will receive an honorary degree of doctor of laws from University of Toronto at a special convocation Oct. 14. It was announced. Hon. Ernest Lapointe, minister of justice, and W. Sherwood Fox, president of University Ontario, will receive similar degrees. 2276

Record Grain Shipments

Terminals At Edmonton And Calgary Filled To Capacity

Calgary.—Terminals on the Canadian government elevator system at Edmonton and Calgary, which have a storage capacity of approximately 5,000,000 bushels of grain, were reported filled to capacity on Oct. 4.

An embargo following record shipments during September has been placed on incoming shipments from country points to the terminals.

Seventeen million bushels of grain, transported in 10,000 cars and valued at \$9,600,000, were moved through Calgary during September.

This was a new record, establishing an all-time high since the grain inspection service was established here some 40 years ago.

REJECT PLAN TO SPLIT SPAIN INTO TWO NATIONS

Paris.—A plan to partition Spain into two nations—one a democracy, the other a dictatorship—has been rejected by the Spanish government, which rejected it, government spokesmen here disclosed.

They asserted the plan, its origin obscure, would form part of international discussions aimed at ending the Spanish war as part of a general European settlement.

It was hinted "certain powers" brought up the Spanish partition scheme at the Munich party Sept. 30 which arranged for giving German allies of Czechoslovakia, Europe's other major trouble zone.

All events it was clear the Spanish problem, temporarily displaced by the Czechoslovak crisis, had come to the fore again since it figured in all talk of a four-power agreement for appeasing Europe.

In Rome the British ambassador, Lord Perth, and Foreign Minister Count Ciano have been holding consultations believed aimed at putting the Anglo-Italian Easter friendship pact into effect.

A Spanish "settlement," presumably involving withdrawal of Italian soldiers fighting with the insurgents, was a prior condition Britain made to operation of that pact.

Premier Juan Negrin, speaking in the cortes (parliament) recently, indicated he opposed such a division of the nation.

Government Spain, meanwhile, is completing plans for evacuating all foreign fighters on its side. Travelers reaching the French frontier said approximately 1,000 North Americans, including those in medical and transport services, would be among those to leave soon.

(An armistice on present military lines automatically would split Spain into two states, undoubtedly hostile to each other at first. But the view in London quarters was that eventually commercial and then other relations would be established between the two Spanish states leading to some better basis for permanent peace in Spain.)

Escape By Parachute

London.—Ten flyers, the crews of two Royal Air Force planes, parachuted to safety when their planes crashed. One fell over Yorkshire, the other over the English channel.

DR. ALLAN ROY DAFOR

Fighting a \$1,000,000 suit filed by Ivan J. Spear, a Chicago promoter, in Chicago, Dr. Dafor, the Dominion chiropractic physician, is pictured in court. It was charged that Dr. Dafor conspired with others to break a contract entered into a few days after the quints were born; but the case failed without defence witnesses being called.

Freight Rate Argument

Request By Lake Shippers For Increase Is Refused

Ottawa.—A request by lake shippers that a temporary maximum rate of 7½ cents a bushel be set for the shipment of wheat from the lakehead to St. Lawrence ports was refused by the board of grain commissioners.

The request was made as shippers sought an increase in the maximum rate of seven cents set recently by the board. They requested to be allowed to accept orders at 7½ cents while the board considered their representations. The effect of the decision is to continue the seven cent rate which took effect Oct. 1, at least until the board reaches a decision on the representations.

In their argument the shippers charged what they considered reasonable rates this season to help them make up their losses.

Grey Owl's Estate

Difficulty Arises Over Disposition Of Noted Author's Fortune

Toronto.—Hugh Kayser, Toronto publisher, said in an address the "considerable fortune" of Grey Owl, noted author and naturalist who died early this year, has not been distributed because of conflicting claims against the estate.

Disposition of the estate, he said, held the maximum of 7 cents was too low and threatened the continued operation of lake boats. They argued they suffered from losses in seven years and asked to be allowed to charge what they considered reasonable rates this season to help them make up their losses.

Following the death of the naturalist, who had described himself as a half-breed, it was stated in some quarters he was born in England of white parents.

Settling Labor Disputes

More Rational Way Must Be Found To Determine Wages

Toronto.—President Charles W. Chase of the American Transit Association, said a national, peaceable manner of determining wages must be found to replace the present arbitrary methods of settling labor disputes which had proven a failure.

He said this should be accomplished while still maintaining the continued existence of the property, its credit, a reasonable return to its owners and the furnishing of an efficient and modern service of the character the public demands and is entitled to.

MUNICH PACT IS DENOUNCED BY CHURCHILL

London.—Drawing on all the bitterness and force of his oratorical ability, Winston Churchill swept into the leadership of parliamentary forces arrayed against Prime Minister Chamberlain's bargain with Chancellor Hitler as incorporated in the Munich agreement.

Mr. Churchill predicted Great Britain would rue the day the Premier Chamberlain's bargain with Chancellor Hitler as incorporated in the Munich agreement. It was a "total, unmitigated defeat," would lead to German domination in Europe, would result in the small nations distrusting French and British friendship—and might mean the destruction of the democracies themselves.

Here are some typical Churchill sentences. "The utmost the prime minister was able to gain for Czechoslovakia has been that the German dictator, instead of snatching his victims from the table, has been content to have them served to him course by course."

"Britain should have declared a long time beforehand she would join with others to protect Czechoslovakia against any further aggression. The government refused to give a guarantee when it would have saved the situation, yet they gave it too late and for the future renewed it when they had not the slightest power to make it good."

"You have to consider the character of the Nazi movement and the rule which it applies. A power which burns Christian ethics, which views its onward progress by barbarous paganism and vaunts a spirit of aggression and conquest, which derives strength and pleasure from perverted persecution and uses threats of murderous force—that power cannot ever be the trusted friend of British democracy."

"The people should know there has been gross neglect in our defences and that we suffered defeat without war, the consequences of which will travel with us along the road. The people should know we have passed an awful milestone; that the whole equilibrium of Europe has been challenged."

Mr. Churchill urged concentration on the rearmament program in an effort to retrieve Britain's prestige, defensively and diplomatically. Industry should be mobilized immediately. There must be supremacy in the air.

Richard Acland (Liberal), who returned recently from Czechoslovakia, told the house: "I saw in Prague a young Czech woman with the mark of a swastika branded on her chest with a red hot iron, and a doctor who was with me told me he had treated that morning an eight months old baby with the sign of the swastika the size of a shilling branded on its face."

"Those are the devils to whom you have handed over these decent innocent people," he shouted across at the government benches.

Mr. Acland also claimed British diplomacy sank to a new low level when the British ambassador in Poland was "told to go to hell. It was said in Polish but that was what was meant."

Seaplane Wrecked

Victoria.—Captain Terry Finney and Ralph Bonner, both of Victoria, escaped with slight injuries when the De Havilland "Albatross" seaplane spun out of control and plunged 100 feet into a boom of logs in nearby Esquimalt harbor.

FRANCE WANTS TO KEEP RUSSIA AS AN ALLY

Paris.—Foreign Minister Georges Bonnet intimated before the foreign affairs committee of the chamber of deputies that France still wants the Soviet Union's big army on her side despite any agreement she may reach with Germany.

The reading of a telegram from Hitler to former premier Pierre Flaud caused an uproar at another point in the committee meeting. The fuhrer thanked Flaud for his efforts toward "complete collaboration between France and Germany."

Bonnet said he "hoped" Russia would join the projected international guarantee of what is to be left of Czechoslovakia. Committee members said he expressed the stand of the French government.

Reichsfuhrer Hitler has been reported instantly opposed to Russian participation in the guarantee.

It appeared the French and British governments had ruled against exclusion of Russia.

Still another development in the crisis aftermath was a move by Premier Daladier to denounce French armed forces despite little indication Germany was taking similar steps.

Bonnet's reference to Russia was interpreted in conjunction with that of Sir John Simon in the British House of Commons when Sir John, member of Prime Minister Chamberlain's "inner cabinet," said: "It is our hope that Russia will be willing to join in the guarantee of Czechoslovakia."

The Munich decision which decided Czechoslovakia should be dismembered to meet Hitler's demands, excluded Russia.

The reading record of Britain, France, Italy and Germany had been interpreted in some quarters as the start of a four-power directorate of European affairs with Russia left out.

Flaud, a leader of the right in the chamber, acknowledged authenticity of the Hitler telegram and said, "Permit me to ignore this incident." Before the Munich accord Flaud announced refusal to honor the French mutual assistance pledge to Czechoslovakia.

National Marketing Policy

Is Great Need Of Western Canada Opinion Of Saskatchewan Men

Saskatoon.—Formulation of a national marketing policy, and creation of a national commission for establishing markets for Canadian farm products in the large centres of population in the European continent, as well as in the United Kingdom, were described as the greatest needs of the western Canada producer by W. A. Landreth, of Winnipeg, president of the Western Canadian Producers' Association. In an address here to a service club.

"We have advanced far past the time when we could market any surplus produce in eastern Canada," Mr. Landreth stated. "Partly because the east is not able to absorb as much of our goods as formerly, and partly because our production has increased greatly, we must look overseas if our western farmers are to have any permanent prosperity."

"I am speaking particularly," Mr. Landreth explained, "of our western production of butter, eggs, cheese, and poultry meats. For a long time we have been producing large surpluses of cheese, and of good quality, and our overseas market is pretty well established now. But in the other lines I have mentioned, there is still the greatest need for a national commission to study the markets, create new markets, and inform our producers as to how to go about capturing these new markets."

Germany's Colonial Claims

East Africa Must Be Consulted Before Any Steps Taken

Nairobi, Kenya, British East Africa.—East Africa must be consulted before any irrevocable decisions regarding the future of Tanganyika are reached, the East African Standard declared.

"It would be impolitic and unjust of Prime Minister Chamberlain to assume that any negotiations with Germany could be concluded without the prior knowledge and consent of the East African territories and of South Africa," the newspaper said.

Tanganyika, formerly German East Africa, is to the south of Kenya and has frequently been mentioned in connection with Germany's colonial claims.

These upstanding lads are Czechoslovakian marines, photographed on a river patrol boat when war seemed a certainty.

CROSSFIELD, ALTA, THURSDAY, OCTOBER 13, 1938.

Around Field and Barn.

By E.M.C.

Many farmers are puzzled to know just how to work their dry summerfallow to destroy weed growth without causing the soil to drift. Recent rains will not change conditions much.

The general opinion seems to be that if the field has been drifted at any time it would be better to leave the growth. The frost will take care of the wild oats, and the early spring cultivation will destroy a large percentage of stink weed.

The pig weed, however, will shatter seeds and may cause trouble later in a good growing season.

The cultivator is the only implement that can safely be used on such land at this late date. Shovels sharp and ridge deep.

The old gentleman sat on the running board of his expensive eight-cylinder car. He had shown me the sight of the saw mill from which he had sold lumber at \$6.00 per thousand over 40 years ago.

The large slough that had been over full of water, and bone dry, and now had a fine crop of oats growing.

The log house in fair condition, but long since abandoned.

He was telling me of the days when a dollar was of more use to him than a quarter section of good land; and if you did not have the cash you did not buy the goods.

There was no wheat, weeds, or debts. There were prairie fires and short pasture and hard winters, and stock died, but no mortgage.

Said he, "I was happier in that old shack than I am today in this car."

Said I, "That's just looking backward."

"No," he said, "I know I am well fixed, and have been for years, but I did not know when to quit. Now my wife is failing and I am too old to get the good out of it—it's too late."

He started up the motor and you could not hear it run. The long, steep hill that had taken many a weary horse an hour to pull, we glided over at forty miles per hour. He pointed out the old trail as we passed.

I turned a button on the dash board and instantly there was a voice in the car saying, "Chamberlain returned to London by air." The oldtimer did not heed. I am sure he was listening to the wagon creaking over this same hill.

What is progress? And what shall it profit a man or a nation if—?

Three Main Phases Being Carried Out For Prairie Rehabilitation

The rehabilitation of agriculture throughout the drought and soil drifting areas of the three prairie provinces is being undertaken on a wide and comprehensive scale through the Prairie Farm Rehabilitation Act passed by the Dominion Parliament in 1935 and amended and enlarged in 1937. As now organized, the program embraces three main activities: cultural work to promote systems of farming that will afford greater economic security; water development to encourage and assist in the fullest utilization of all available surface water supplies, and land utilization where areas of inferior soil are being removed from crop production and community and reserve pastures established.

Over forty-seven district experiment sub-stations regarded as outposts of the Dominion Experimental Stations in the drought areas have been established particularly to demonstrate and test best known cultural methods to make the most possible use of the limited moisture available and control soil drifting. The co-operation of individual farmers and communities is being obtained through the organization of Agricultural Improvement Associations. Over 100 associations including 14,000 members have been organized. Other cultural work includes tree planting, regrassing, and reclamation of badly drifted soils for cropping or pasture and soil research including co-operative investigations into specific soil problems at each of the provincial universities.

Water development including engineering and financial assistance to individuals and communities, is a major activity of P.F.R.A. By the end of 1938 it is estimated that the number of completed individual dugouts, stock watering and irrigation dams will exceed seven thousand in the three provinces. Nearly 50 per cent. of these individual projects are dugouts holding one acre foot or less of water. About 15 per cent. are irrigation projects irrigating from three to five up to fifty or more hundred acres of land and the remainder are stockwatering dams holding for the most part from five to ten acre feet of water. In addition, scores of small community and municipal dams have been constructed to provide water for community purposes.

Some 38 larger community projects have been completed or are under construction including the Lake Project where storage will be provided for seventy thousand acre feet of water from the Frenchman River and Battle Creek for the irrigation of twenty thousand acres of land in southwestern Saskatchewan. Large projects completed or under construction when fully developed will provide for irrigation of upwards of 125,000 acres of land in Alberta and Saskatchewan.

The P.F.R.A. land utilization work is actually agricultural rehabilitation on a community basis. It has been estimated that about twenty-five per cent. of the soil of the sixty million or more acres of land within the open plains area of the three Prairie Provinces is sub-marginal or non-arable and where farmers should not be encouraged to remain. These lands, therefore, are being removed from crop production. By the establishment of community pastures and reserve areas are being turned back to grazing. While wheat growing is recognized as the main economic crop, the establishment of community pastures on inferior types of soil will, it is believed, result in the re-establishment of prairie agriculture on a basis more keeping with natural conditions and these lands put to their best economic use. The establishment of pastures, so far limited to Saskatchewan, is based on soil surveys by competent authorities, supplemented by detailed agricultural and economic surveys. Briefly, then, P.F.R.A. is providing means for concerted and co-operative action on the part of all Dominion, provincial and municipal agencies in establishing a more secure agriculture in the drought affected area of Western Canada.

Obstacle To Trade

G. H. Ward, secretary of the Canadian Chamber of Commerce in Great Britain, told the Canadian Export Club that one of the biggest obstacles Canadian manufacturers must contend with in marketing their products in the United Kingdom was the prevalent belief that Canada is economically at least, a part of the United States.

Corals cannot live in water colder than 65 degrees Fahrenheit.

Time Of Thanksgiving

Indian Day Conducted For First Time In Canada

It is the season of the Hunting Moon. The deer and moose and the bear and the smaller game that roam the woods and fly the fields now becoming scarier, are fair target for the Indian hunter.

Indian summer approaches. The year has been made perfect by spring and summer. It is the season lush with Nature's gifts of fruits and flowers and much corn and the fields have yielded enough that the cornucopia is spilling over.

It is the Indian's time of thanksgiving.

These were the reasons given by Dr. Barnabas Shihshih, Great Sachem of the Indian Association of America, Inc., for the institution on the last Saturday in September of each year of Indian Day, now recognized throughout the United States, but conducted for the first time in history in Canada on the premises of Chief Little Valley at Beavertown, near Brantford, Ont.

The religious side of the celebration was conducted at the Cayuga Longhouse, where a temporary altar was erected. Dr. Shihshih performed the liturgy and preached a sermon according to the Byzantine rite of the Eastern Church. Shihshih is an ordained minister of the Greek Catholic Rite and missionary-at-large to the Indians. He is a member of the Blood Tribe, born in Manitoba, and raised in Montana. For 25 years he has worked and written on behalf of Indian Day, which first was proclaimed in New York State in 1917. The movement grew, with proclamations in the State of Illinois in 1918 and the State of Washington in 1919. From then on, institution of the day throughout the United States was the rule.

According To Analyst

Receding Chin Theory Has Nothing To Do With Character

Ladies! If your husbands like to throw ashes on the carpet, go to the office in slippers, or now the lawn in winter, don't be harsh. They can't help it.

At least, that is the assertion of W. C. Colclough, Stratford insurance man, author, and character.

"There's a reason why one man has a bump on his nose, why one has 'professional' ears and one 'executive,'" he stated. "Each tells a different story in personality."

"The person with the bump has a nervous heart, not necessarily diseased, which would mark him as a fast mover. Character analysis has shown, too, that brunettes cultivate deeper friendships than blondes, but on the other hand, fair-haired people have more initiative," said Mr. Colclough.

"A survey of salesmen has shown the majority are blond, when a glance at a convention of ministers will reveal they are practically all dark-haired," he said.

Mr. Colclough scoffed at the belief a receding chin indicates lack of determination. In fact, the inability to make quick decisions which accompanies the so-called strong chin, retards a man in business, he asserted.

Liable To Fine

German Ship Sails From Canada Without Clearance Papers

The German freighter Hans Leonhardt rendered herself liable to a \$400 penalty by sailing from Victoria, N.S., without customs clearance papers, national revenue department officials said.

The penalty will be collected should the ship return to Canada within three years. If she does not return within that time and her master does not pay the \$400 the ship would be seized and held for 30 days. If the \$400 was unpaid then, she would be auctioned by the customs department. Should she not return to a Canadian port within three years, the penalty expires.

Brought By Basques

Ancestry of the famous Newfoundland dog has been traced back to 1506 when Basque fishermen visited the new world island. They brought with them white or cream colored sheep-dogs used by Pyrenean shepherds to protect their flocks.

Hollyhocks 13 feet high have been grown at Holloway prison, in England.

STRANGER THAN FICTION

Early in July some 80 tourists gathered at Gretna Green to witness a mock marriage, symbolical of that Scottish village's former fame as a haven for runaway marriages. From the crowd two complete strangers were chosen as bride and groom—Miss Dorothy Geenty of Ortonville, Minn., and William James Brinton of Johannesburg, South Africa. A friendship started which reached its climax when the pair were married in Minneapolis on Sept. 10 and this photograph shows them as they sailed from Quebec on the Canadian Pacific liner "Empress of Australia" on the first lap of their journey to South Africa.

Old Tattoo Artist

Intends To Get Back Into The Business Some Day

Charles Johnson, who claims to be Canada's foremost tattoo artist, retired from the business 22 years ago, but intends to get back into it some time. He works in a New Toronto factory.

"Once in the show business, always in the show business. You never lose the urge to get back, no matter how long you've been away from it," he said.

Charlie was a tattoo artist in Montreal for 15 years. He travelled all the big-time circuits on the continent. He knew the New York Bowery in the old days and Chicago's big-time circuit.

"There's not enough business now," he says. "A fellow has to have something else to do besides tattooing. The best way is to have a shooting gallery or something like that so you don't have to depend entirely on tattooing."

"There's only one tattooer in Toronto now," Charlie continued, "but he doesn't work full time at it."

Those Who Talk Shop

Are Usually Men Who Are Interested In Their Work

The librarian of the great American prison of Sing-Sing wanted to know what types of book the convicts preferred.

He asked 200 of them—and five said "Crime stories." But a check on the records showed that 75 per cent. of books taken out were crime stories.

Perhaps the coyness of the convicts can be simply explained. Perhaps they did not want the librarian to know they liked talking and reading "shop."

The most stupid of modern poets is "no talking shop." Why a man should be thought a bore if he talks about his job but all right if he talks golf or racing is one of the big mysteries of 1938.

It's just sham. If we really were not interested in our jobs we should not have them for long.—London Sunday Dispatch.

Smart "Two-Some" Crocheted Easily

Household Arts by Alice Brooks

PATTERN 6201

The beret—so flattering—so suitable for many occasions—is yours for the making. Yarn is effective for this one with matching purse. Pattern 6201 contains instructions for making set; materials needed; illustration of set and of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Eminent Authority Says That Canadian Nutrition Is Probably Highest In World

Work Of Six Years

Ex-Service Man Made Suite Of Inlays

In Briarcrest, Sask., is to be found a suite of inlay furniture which cannot be matched anywhere in Canada. It is all handmade and is the work of an unemployed ex-service man, who calls it his "depression furniture," for he says that had it not been for the depression he would not have had the time to build it.

The suite contains Morris chair, rocking chair, arm chair, settee, center table, library table, two jardiniere stands, serving cabinet and grandmother's clock.

The woods used in the inlays include oak, maple, black walnut, mahogany, soft maple, red Tennessee cedar, Mississippi curly pine, ebony and holly.

Work was started on the suite in March, 1932, and some idea of the inexhaustible patience of the maker can be gained when one learns the top of the table contains 850 pieces. The serving cabinet contains 1,496 pieces and entailed hours of labor, while the grandmother's clock and was built at a cost of 1,274 hours of painstaking effort.

In all, there are between 12,500 and 13,000 inlays in the whole suite, scores of which are so small that a special drill had to be made out of a diamond needle.

All the furniture has been given a natural finish and the smallest spot is a definite inlay, with nothing painted on.

With the exception of the clock and the serving cabinet, the pieces were all made from rubbish. For instance, maple was obtained by scouring the country for old-fashioned bed springs with wooden sides and more than 25 of these were cut up and used in these pieces. Black walnut was obtained from an old organ, while the mahogany was also a broken piece of furniture salvaged from the scrap heap. All eight pieces were completely finished at a cash cost of less than \$10.

No machinery has been used on this work, but only such tools as may be found in any average farm workshop. In fact the maker has various carpenter tools which were never used for this work at all.

All patterns and designs of each article are original, each piece being designed as the article progressed. The whole suite would make a really worthwhile exhibit in any furniture store.

To Protect Wheat

Plan To Prevent Grain Being Stolen From Granaries

Furman McKean, who farms in a district north of Rouleau, Sask., is carrying out a plan which he thinks will prevent wheat being stolen out of his granaries, or if wheat should be stolen will make it easy to detect the thief.

He has had his name and address printed on a large number of small slips of paper and when he puts his wheat into granaries for winter storage he will sprinkle the slips of paper all through the wheat.

Mr. McKean believes that if a possible thief notices the paper slips the grain is not to be stolen, or if the grain is stolen and taken to an elevator to be sold the seller will be questioned by the elevator agent. In the event of the grain being sold successfully and without question the slips of paper bearing Mr. McKean's name and address will make it a simple matter to trace the grain.

Mr. McKean is taking this precaution in regard to his stores of wheat because his farm already has been visited by thieves and quantities of barbed wire stolen.

Holds Speed Record

Streamlined Express "Coronation" Travelled 125 Miles An Hour

The recent run of the London and Northeastern Railway streamlined express, "Coronation," when a speed of 125 miles an hour was attained, according to the Railway Gazette, a world record for steam-hauled, says Industrial Britain. At the time it was known to be a record for a British locomotive, but since July 3, when a diesel took place, it has been revealed that a German record which had been regarded as the fastest steam locomotive speed hitherto attained, was actually lower than that of the L.N.E.R.

"Ma, the boot repairer's called for his money."

"Tell him he's out of his turn. I haven't seen the boots yet."

Receives Fortune

Chicago Man Inherits One Hundred Million On His Birthday

Marshall Field III, grandson and namesake of the Chicago merchant prince, inherited a \$100,000,000 fortune recently, on his 45th birthday. It represented the accrued interest on the estate left by Marshall Field I, when he died in 1906 and was the forerunner of an inheritance five times that amount.

The three-married Field will get the entire estate of \$300,000,000 five years hence, when he reaches the half century mark.

It isn't safe to judge a man by what he stands for any more. It's what he falls for that counts.

GRIPPED BY MISERY OF A SORE THROAT!

(DUE TO A COLD)

Do this NOW—get it with direct relief. Vicks VapoRub is the most powerful vaporizer on the market. It brings down the inflamed membrane, bringing blessed relief—where you want it—when you want it.

Then TONIGHT—massage throat, chest and back with VapoRub. Its poultice-vapor action loosens phlegm, clears air-passages—eases coughing—relieves local congestion.

This 3-STEP METHOD is one of the proved ways of using VapoRub that have made it a policy remedy in more homes than all other remedies of its kind.

VICKS VAPORUB

WORLD HAPPENINGS BRIEFLY TOLD

Canada's imports of farm implements and machinery in August jumped to \$5,299,963, or \$1,754,000 in August, 1937, the Dominion bureau of statistics said.

An "Avenue Neville Chamberlain" in historic Versailles will henceforth commemorate Prime Minister Chamberlain's successful efforts to keep peace in Europe.

Manitoba's mineral output for the six months ended June 30 last was valued at \$7,706,712, an increase of \$1,126,043 compared with the same period last year.

Hundreds of Britons went back to stores with food supplies purchased hastily during the war crisis, and asked for their money back. Many firms accepted the returns.

One Ottawa baby bears the Christian name of Britain's prime minister. He is George Neville Reid. His father, a war veteran, is on the national defence department staff.

W. J. Windbank, of Mission, B.C., arrived at Halifax, after a 14-day, 4,000-mile trip on a motorcycle. He intends to take up science at Dalhousie University. He averaged from 350 to 400 miles a day.

The Post Office Department announced new post offices have been established at New Edinburgh, Man., and Uchi Lake, Ont. A new post office was also established at Lapeen Siding, Alta.

A teller in a bank at Palmerston, Ont., was not quite sure of the correct procedure when a resident presented a cheque dated 1918. The cheque, drawn on the Bank of Hamilton for \$25, was not cashed.

Grain harvested on the Hobbema Indian Reserve, 50 miles south of Edmonton, totalled about 400,000 bushels this year. Biggest crop on the reserve was grown by Pete Wolf, who threshed 5,000 bushels of wheat and several thousand bushels of coarse grain.

Still A Popular Attraction

Thousands Visit Imperial War Museum in London Every Year

Relics of the great war continue to attract thousands in London. An official report shows approximately 350,000 people visit the Imperial war museum annually.

New additions to the museum's exhibits include a steel helmet worn by King George V. on Wyntcheste ridge on July 4, 1917, and souvenirs picked up by the King at Vimy ridge on the same visit to France. Also there is the King's copy of the message he sent to the troops of the expeditionary force on Aug. 12, 1914.

Inquiries made at the museum cover every aspect of the war. Some of them show the influence of current events. All but one of these inquiries has been answered. The question which has completely baffled the librarian is the origin of the word "blimp".

Commenting on this, the News-Chronicle remarks: "But what other name was possible for those sausage-like balloons—and sausage-mild colic?"

For All Tastes

Budget has a population of 1,000,000, and there are 22 political daily newspapers to choose from. Apart from that there are 26 news agencies, 40 official papers, 46 political and municipal papers, 150 economic and 150 industrial ones, and about 100 denominational journals. Something for all tastes.

Columnists who deliberately write bad English seem to overlook the fact that enough bad English is already being written by people who are not trying to be funny.

Coal For British Ships

Ship To Be Built To Show The Advantages Of Coal

An experimental ship, costing approximately \$80,000 (about \$400,000) will be built in Britain to demonstrate the advantages of coal as fuel.

With the moral support of the admiralty, the undertaking is being promoted by interests represented on the mines department committee, which has been examining possibilities of increasing the national interest, use of coal for bunkering purposes.

The type of ship to be built will be in the cargo and intermediate passenger liner, considered to have the best chance of competing successfully with oil. A company, to be formed if the experiment proves a success, will undertake construction of a fleet of similar vessels.

Criticism of the policy of using oil instead of coal by the British navy and much of the mercantile fleet, has been growing in recent months. The critics contend national security is menaced by dependence on foreign sources for fuel supplies. They also argue that the rapid elimination of coal as ship's fuel is undermining the vital coal industry.

A number of naval authorities and navigation leaders have given their support to the coal campaign, but Rear-Admiral G. W. Baldwin, now retired, believes there have been sound reasons for favoring oil.

"During the past 40 years," he says, "the fixed policy of successive boards of the admiralty has been the gradual elimination of coal from the fleet in favor of liquid fuel. Similar changes have been effected in other navies and all of them with one object—to obtain from each ton of warship displacement the maximum of such desirable and essential features as gun-power, armor, water-tight sub-division, speed, fuel and endurance."

ADORABLE WITH SHIRRED PANEL!

By Anne Adams

These youngsters just can't wait to get out and "show off" these adorable new bloomer-dresses, since they're different from any in the block! The secret of such smartness is that both are made according to Anne Adams new Pattern No. 4950! Look—the panel front, divided at the waist, has the lower half shirred. One version shows bodice panel and collar in contrast fabric. The other tells how adorable a collarless neck is, with trim of braid and ribbon. Choose percales for everyday, dimity for parties. The making's simplified by the Sewing Instructor!

Pattern 4950 is available in children's size 4, 6, 8, 10 and 12. Size 6, dress with collar, takes 2½ yards 36 inch fabric and ¼ yard 2½ inch contrast; collarless dress, 2½ yards 36 inch fabric and 1 yard ric-rac.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

An elastic substance found in the mouth of whales is our source of whalebone.

The wireless station in Franz Josef Land is the northernmost radio outpost in the world.

As a tablecloth for their camels Arabs often spread their cloaks on the ground.

Daily use of WRIGLEY'S TOOTH PASTE is fine for teeth.

Dentists recommend Wrigley's Tooth Paste as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums, aids digestion, relieves stuffy feeling after meals. Helps keep your healthy! Take some home for the children too—they will love it!

Growing in Popularity

Air-Conditioning Will Soon Be Regular Feature In Homes

Mark Twain was wrong. He said "Everybody talks about the weather but nobody does anything about it." Heating engineers have been studying it and have discovered that it is not enough to have the right degree of temperature in our homes, but to make us comfortable, we must have the right amount of moisture, the air in motion, and free from dust particles. They are about to change the weather in our homes, making them cool and less damp in summer and warm and properly humidified in winter. This new process they call air conditioning.

By evaporating water in the heating plant they can humidify the air. Filters can clean it, and blowers can keep it in motion. It will be more difficult and more expensive to take out some of the moisture from the air and keep it in motion and filtered in the summer.

Many new homes are installing air conditioning plants, and some are adding these to their present heating systems. A few are arranging to air condition one or two rooms of the house. The time will come when air conditioning will be a regular feature of "modern conveniences."

Education Costs

Fall Heaviest On Shoulders Of The Rural Population

Due to the unequal distribution of population and of children, education costs fall more heavily on the shoulders of the rural population, says the Brandon Sun. Violent fluctuations in the prices of primary products affect the smaller urban and the rural communities more acutely than they do the large urban centres depending on a more diversified economy. The only solution to this problem seems to lie in the creation of a larger unit of school support with the cost equalized over all the communities in the unit, urban and rural, large and small. Although the province would be the most effective unit, two things stand in the way: the hesitancy of the local school boards to yield their autonomy to provincial governments and the inability of the provinces to assume the greater financial burden involved. A redistribution of responsibilities or powers of taxation among municipalities, provinces and Dominion is necessary to solve the local problem and most provinces are obstacles to an equitable solution.

AIR RAID SIRENS MAY NEVER BE USED

Hundreds of air raid sirens, working on the principle of the gadget used by boys on bicycles, had been ordered by the British Government from a Leicester firm for use in the Metropolitan area and many provincial cities. A 4-h.p. motor sucks in air at one end and, placed at intervals of a mile, the sirens were to sound an alarm that would warn the populace of approaching air-raiders. Now, happily, they may never be needed. Our picture shows some of the sirens being prepared for shipment.

Thinks Record Is Safe

But Captain Evelyn Believes He Could Travel Even Faster

Captain G. E. T. Evelyn, the bespectacled Englishman whose Thunderbolt holds the world's land speed record of 357.3 miles an hour, told the Empire Club luncheon in Toronto: "I am satisfied Great Britain has put this record where it will be difficult to lift by any one outside the country."

When the part of getting the record in when it is all over," according to the man who on Sept. 10 hurtled over the Bonneville Salt Flats, Utah, faster than any human ever before, he refused to discuss the record in the future and hard work that he frequently glanced down at his pile of notes and almost as frequently smiled broadly at his own quiet and ironic jokes. Captain Evelyn told of the thrill and hard work that he had experienced during the record run.

And while there was no mistaking his quiet pride in the achievement, he did not regard "the magic six miles a minute" as the absolute high for land. "As far as Thunderbolt is concerned, I am quite confident the car is capable of doing more," he said, adding however, that "a tremendous lot of development work must be done before we shall begin approaching the 400-mile-an-hour mark."

While the greatest thrill for the driver of the record-breaking car was "when it was over," the greatest thrill for the spectator was in the fact the thunderous roar of the speeding car followed it at an interval of one-half mile, he declared.

Germany Needs Wool

Would Like To Exchange Diesel Trucks For Australian Product

The vice-president of a German firm which employs 16,000 people recently arrived in Sydney, Australia, from the Far East where, he said, his firm had received orders for fighting planes, he refused to disclose which power had given the order. His firm was producing about 40 planes a month for the German air ministry. He had gone to Australia seeking orders for Diesel trucks, built by his firm, in exchange for Australian wool which Germany needed.—Brandon Sun.

Money For Luxuries

Dominion Bureau Of Statistics Gives Figures For 1937

Dominion Bureau of Statistics says Canadians spent something like \$190,000,000 in 1937 in three or four luxuries: to wit: For liquor, \$100,000,000 (\$10 for every man, woman and child in the country); 6,000,000,000 cigarettes, 123,000,000 cigars; wagered \$21,000,000 at race tracks. "It makes one almost believe," says the Ottawa Journal, "that, apart from the unemployment of many, much of our 'hard times' thought is largely psychological."

One of the things in a house that attracts most interest is a pretty daughter. An ugly mortgage also seems to attract considerable interest; more interest, in fact, than the home-owner feels like paying.

Bans were placed on lace-wearing in England during the reign of Queen Mary Tudor, 1558-1558.

SUNDAY SCHOOL LESSON

OCTOBER 16

REVERENCE FOR GOD

Golden text: Our Father who art in heaven, Hallowed be thy name. Matthew 6:9.

Lessons: Exodus 20:7; Matthew 5:33-37; 12:33-37.

Devotional reading: Exodus 33:17-23.

Explanations And Comments

The Third Commandment: Reverence for God, Exodus 20:7. Thou shalt not take the name of Jehovah thy God in vain. Name stands for character, personality. In vain means lightly, heedlessly. The Jews took the name of God to mean the vocabularies by which he was called; and because they thought the name Jehovah more sacred than Adonai, Lord, the other name of God, they pronounced the former with the vowels of the latter, "a though the Jews took of the trivial and hard work that he frequently glanced down at his pile of notes and almost as frequently smiled broadly at his own quiet and ironic jokes. Captain Evelyn told of the thrill and hard work that he had experienced during the record run."

This commandment in its full meaning refers to a false swearing or perjury in which the name of God has been invoked to ratify a promise or contract. Taking God's name in vain meant breaking the covenant so ratified. God will not hold men guiltless of nations guiltless—who break their solemn covenants.

Swear not at all, Matthew 5:22-27. Again (see verses 21 and 27) ye have heard that it was said to them of old time, Thou shalt not swear falsely. Lev. 19:12, but shall perform unto the Lord thine oath. In Old Testament times the oath was used to make men's vows and promises binding, as when Jacob said to his brothers: "I will be bound by the oath of the Lord." In New Testament times the oath is not used. The Pharisees had made the breaking of vows attested with oaths an easy matter. They said: "I swear by the temple, I make a vow to abstain from food, woe to him if he eateth and, woe to him if he do not eat! What then must he do? Let him go before the sages and they will absolve him from the oath."

Jesus extended the scope of this third commandment to a prohibition of all oaths, whether sworn or not. He said: "Neither by heaven, for it is the throne of God; nor by earth, for it is the footstool of his feet; nor by Jerusalem, for it is the city of the great King. Neither shall I swear by my head, for thou canst not make one hair white or black. Even swearing by your heads, ye are able to swear for every hair is his handiwork, not yours." The Jews thought that if they swore by the heaven or by the earth, or by Jerusalem, then the vow was less binding than if God's name were used. Jesus swept aside the oath entirely. With the oath there were two standards of speech: for a promise taken by an oath was regarded as more binding than one without the oath. Members of the kingdom of heaven, Jesus taught, should always speak the truth, there should be no need of their ever swearing an oath, for their simple "Yes" and "No" should be as binding as if they were sworn in connection with it. Their word should be as good as their bond.

Adapted For Mine Work

Seismograph Will Be Used By Prospector For Locating Deposits

Prospectors in Canada's north will soon be totting seismographs in their packages. Seismographic instruments originally developed to record and locate earthquakes are now being adapted for locating mineral deposits.

Dr. John Patterson of Dominion meteorological bureau, Toronto, expects a big increase in their use in northern Ontario.

Prospectors wishing to explore the mineral possibilities of new territory nowadays put a charge of dynamite as deeply as possible into the ground and station seismographs at a distance. When the charge is set off the instruments record the type of vibrations and their frequency. From these recordings experts are able to determine the type of soil or rock or underneath the surface. With increasingly accurate recording mechanisms the seismograph will be able to locate the richer ores all prospectors hope to strike.

A seismograph may be designed for any specific purpose, he explained, such as to record the vibration caused by a train passing over a bridge. Analysis of vibrations is useful to engineers in every branch of construction.

A Foolish Obsession

Suspicion With Which Americans Look On Canadian Money

A Canadian writes to The New York Times in criticism of the suspicion with which Americans look upon Dominion money whereas U.S. coins are readily accepted on this side of the line. It is one of the peculiar traits of many star spangled banners that they do not regard outside currency of any value and their obsession in this respect is as childish as it is persistent.—Brantford Expositor.

Famous cavalry regiments in Scotland are to give up their horses for automobiles.

Ah—it is a grand idea sweetening my morning cereal with BEE HIVE.

TRY IT TOMORROW

Empire Essay Contest

Ten Awards Out Of 46 Come To Canada

Saskatchewan winners in the Empire essay contest for school children, and members of the local branch of the St. John's Ambulance Society, received their awards and prizes at a meeting of the Canadian club at Saskatoon.

Copies of "The Book of the Queen's House," photographed by Queen Mary, were awarded to Lucille Robertson, of Regina, and Joyce Olding, of North Battleford. Helen Stewart, of Saskatoon, received a copy of "The History of England," photographed by the Duchess of Athol.

The awards to Miss Robertson and Miss Olding were personal gifts from Queen Mary, as that to Miss Stewart was from the Duchess of Athol.

The presentations were made by the guest of honor at the gathering, Malik Sir Firozshah Noon, K.C.I.E., high commissioner for India in Great Britain and Northern Ireland.

"It is worthy of note, in view of the population of the British Empire, that ten of the 46 awards came to Canada, and of these ten, three came to Saskatchewan," Sir Firozshah remarked, in making the presentations.

On behalf of the St. John's Ambulance Society, of which society he is a knight commander and chairman for the Punjab, his native province in India, Sir Firozshah presented awards to three Saskatchewan winners: Mrs. Margaret Johnston, head of No. 7 nursing division, first, bar to long service medal; Mrs. E. M. Boyle, long service medal; Mrs. A. Reynolds, long service medal with red star.

Ontario Village Sold

Proceeds To Pay Back Wages Of Telephone Operator

The almost-forgotten village of Bowling Green, Ont., in Dufferin county near Orangeville was sold at auction to pay back wages of a telephone operator.

Bowling Green, for the most part, belonged to Henry Edgar, along with a telephone line that runs over the country, link up 400 homes. Henry left no will when he died last spring and it was decided to sell the village to pay the back salary of Phyllis Maltby, switchboard operator. Miss Maltby had worked six years without getting any money. Her salary was set at \$100 a year.

An old house named Bill went for \$25; an old table brought an even dollar.

A blacksmith shop and a few houses and lots brought the major portion of Miss Maltby's salary. When they sold the blacksmith shop, 60-year-old George Rayfield stood in the background. He operated the establishment 60 years ago.

Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

By DR. J. W. S. McCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to The Health League of Canada, 105 Bond St., Toronto, Ont.

JOYS AND GLOOMS

MANY PEOPLE CAN safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one

month. Then, if you do not feel better, return the Postum container top to General Foods, Limited, Cobourg, Ontario, and we'll refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

DON'T BE A GLOOMY DRINK POSTUM!

Question is Settled

Soundings Have Been Taken Of Saskatchewan Lake Depths

The popular question with visitors at Saskatchewan's lakeside resorts each summer is, "How deep is the water?" The answer usually given offhand but with an air of great omniscience by the residents is, "Oh, about 600 feet," or it may vary from "Just a few feet" to "No bottom has been reached." The question is settled once and for all by Hon. W. F. Kerr, Minister of Natural Resources, who has just issued a list of soundings of the various lakes taken by officials of his department. The following facts on depths and areas of well-known lakes in the province, while they dispate the charm of exaggeration heretofore enjoyed by the residents, are nonetheless interesting: Last Mountain lake, 65 miles long and from one to four miles wide, is 104 feet at its deepest point, and covers 186 square miles; Lake Katapewa, seven miles long by two miles wide, has a maximum depth of 75 feet; Midge Lake, 5 miles long by 4 miles wide, is 90 feet deep; Kenosee Lake, 48 feet deep; Mission lake, 75 feet at its deepest point; Pelletier, 60 feet deep.

The deepest of the lakes in the province so far sounded is Pierce Lake, which is 300 feet at its deepest spot and averages some 200 feet. Lake Athabasca with an area of 2,900 square miles, averages 180 feet in depth. Reindeer Lake, largest of provincial waters, has an area of 3,200 square miles.

"It is comforting to know that some what may, there will be no actual shortage of meat for many years," declares a writer. So, after all, the times are not out of joint, says PUNCH.

Hewitt—You don't seem to think much of him.

Jewett—If he had his conscience taken out it would be a minor operation.

Can Stand Punishment

When Two Old Cars Come Together, What Happens?

Believe it or not, we have never actually witnessed an automobile accident (though we have seen the aftermath of many). And we are not anxious to view such a spectacle! The other day as we drove into London at a slow turn the car ahead of us, an ancient chariot, wheeled head-on toward another old bus that was meeting. "Now," we ejaculated, "we are going to see something." There was a crash as of collapsing tinware. Then both cars reversed gears, but for a moment they appeared to be solidly smashed. Then something gave and they drew apart. We expected to see both drivers jump out to view the damage. But no, they backed up farther, turned steering wheels and set off on their respective ways. Not even stopping to give each other a nasty look. "Those old cars sure can stand a lot of punishment," our companion remarked.—St. Mary's Journal.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.N.U. SERVICE

CHAPTER V—Continued

The big man was running about with both hands in the air. Other miners attempted to halt him, but only momentarily. At last he saw Hammond and headed for him.

"I told you it was a new Klondyke!" he shouted. "Look what I found in the clean-up!"

He opened his clenched hands. In each was at least a dozen nuggets, some no larger than a pinhead, others bigger than peas. Kay squaled with interest.

"Isn't it perfectly thrilling?" she asked. There was a queer, feverish glint in her eyes. Her hands opened and closed spasmodically. "Just to think of digging up the ground and picking out gold!"

Olson veered again into mad gyrations, at last to bring up short before Mrs. Joyce and extend his treasures to her.

"Look at Mother," the girl said. "She's actually interested!"

Mrs. Joyce was asking questions and with an extended finger was turning over the nuggets as they lay in the giant paws of Olson. The big man stood there, grinning; somewhat surprised, Hammond saw Mrs. Joyce smile quite gaily. He laughed.

"Gold certainly is anybody's introduction!" Kay shrugged her shoulders.

"But Mother—" she exclaimed, and did not finish the sentence. They went on then to examine the sluice box. After a time Hammond followed Kay's glance as she once more looked back. Olson and Mrs. Joyce were still talking. At last, Kay said, almost fretfully:

"But, Jack, all this isn't getting me started on my gold mine?"

He looked at her. "Why the hurry?" But isn't that what a person is supposed to do, the minute you get in camp?"

Jack started. "You're not serious?"

"Of course I'm serious, silly. Why else should I have a gold mine?"

"A placer claim, since you are serious," he corrected her laughingly. "But I just laid the thing aside for you—merely for fun."

"Then you mean there isn't any gold in it?"

"Of course, I hope there's gold. But what's the need, Kay? There'll be enough coming out of Joe's claim and mine."

"But that wouldn't be my claim, would it? I want to feel it's really

mine—that I got it out of the ground."

"But you couldn't do the actual labor."

"No," she hesitated. "Of course, I couldn't do that."

"Then I'll try to scare you up some men tomorrow. I didn't have any idea you'd actually want to work this. I just laid it aside so you could say you owned a placer."

"Why shouldn't I work it?"

"Couldn't it wait until we get back from Vancouver?"

"Vancouver?" she asked.

"Or," he bantered, "shall we be married here, by Sergeant Terry of the Mounted Police?"

"Oh!" She pushed him playfully. "I thought for a minute you were serious!" Quickly she turned. "Oh, Mother!" she cried almost petulantly, "aren't you ever coming?"

Still smiling, Mrs. Joyce parted from the voluble Olson, and then a few feet away, raised a hand, wiggling her fingers in an extra gesture of parting. Kay straightened.

"Well," she asked, in a tone meant to contain banter, "is he Clark Gable or John Barrymore?"

"He's a very nice man," snapped Mrs. Joyce, her features again emotionless. "And that's an end to the matter." Shortly after that, Kay complained of a headache and led the way back to the cottage. Hammond returned to his work with McKenzie Joe.

It was evening when he once more took the trail upward. This time he did not hurry. The man was thoughtful, obsessed. There was something strange about Kay, her nervousness, her quickness.

Higher he swung along the trail, at last to veer under the jutting point of land which ran out from beneath the cottage; the trail here followed the cliff almost to the veranda, where it jutted straight upward and came out at the cabin steps. Suddenly he raised his head. Low voices which had come faintly from the rear of the building now had shifted closer until he could hear every word.

"And I'm telling you, Mother, that I'm not going to stand for it! I won't—I won't!"

"How are you going to help yourself?" The usually calm tones of Mrs. Joyce were high-pitched, excited. "You live your life and I'll live mine. But I'll tell you this—I had all the damned hypocrisy I wanted with your father."

"But, Mother, this terrible Olson!"

"That's enough about Olson!" Mrs. Joyce cried out. "I'll be the judge in that matter!"

Disparately Hammond began to whisper. The voices ceased. A moment later, Kay Joyce met him at the door, her usual vibrantly pleasant self.

"Oh, come in," she said and kissed him. "We had begun to wonder what on earth had become of you!"

Late that night, Jack Hammond stood with Kay on a jutting point overlooking the valley. Here and there a faint light gleamed in the settlement, a vagrant candle or the dying embers of a prospector's evening fire.

"Kay," said the man almost

abruptly, "I want to talk to you—about ourselves."

"And I want to talk to you about yourself. Why are you so nervous—so ill at ease?"

"It" amazed him. "It's all news to me. Maybe I've been over-anxious to please you."

"Perhaps that's it." She clasped his hand with both of hers, raising it to her breast. The yield of soft flesh fired him. He whirled and caught her tight to his knees, burning her—he felt the touch of her soft hair against his cheek, the brush of an earlobe on his forehead as, eager, roving, he bent to caress the smoothness of her throat.

"I've waited so long for you," he begged. "All my life."

"Jack dear," she gasped, freeing herself. "You say you want me, and then try to crush me to death. But," she shivered deliciously, "how I love it!"

From afar came the roar of an airplane motor, at last to reveal the riding lights of Timmy Moon's plane, skimming high over the mountains in the moonlight; it was the third trip the pilot had made to Wrangell that day. At last the ship banked in a wide circle and with the motor cut off, dropped downward to the surface of the moonlit Sapphire and the nicety of a safe landing.

"Why Are You So Nervous, So Ill at Ease?"

"Timmy's taking chances," said Hammond.

"Oh, he's gone mad with a little money."

"Well, don't we all?"

"I suppose so—although it's been so long since I've seen any."

This was a different Kay, strangely frank, calmly bringing up a subject which Hammond had been reluctant even to mention.

"I want to talk about that," he said at last.

"And I still want to talk about you," she countered. "About your plans."

He was silent a moment. Then: "Did I build too pretty a picture down there in Seattle?"

"Don't be silly. I'm thinking of you. Has everything turned out the way you wanted it?"

"Of course," he answered, with a little surprise. "Naturally we're not making a lot out of those Loom creek placers."

"But you've got some other claims, worth a lot more."

"Yes—if we can only find the gold."

Dream To Be Realized

California Man Will Sail Around World in Small Boat

When Charles Westrem, retired Los Angeles restaurant owner, casually remarked in conversation with his two sons, that he would like to take a trip around the world in a small boat, little did he realize that his passing remark would become an actuality.

For now a trim little 29-foot sailing yacht is in Los Angeles harbor ready to weigh anchor on the first leg of this world cruise.

It was through the persistence of the two sons, Bill, 25, a U.C.L.A. student, and Bud, 18, a recent graduate of Hollywood high school, that the elder Westrem finally had to make good on what he thought was merely a passing remark.

After a year of hard work, during which time the two sons built the trim yacht, it was finally launched a few weeks ago. Except for laying the keel, every part of the boat was built by the two youths, even to the making of the sails. The boat is equipped with a small auxiliary motor, to be used only in entering ports of call.

Outside of a few trips to Catalina Island, 27 miles from the mainland, the three have had no previous sailing experience. Bill will act as navigator. When questioned about the danger of the trip, Bill Westrem remarked:

"We expect to make it a leisurely one and expect to be gone about three years. Of course, there will have to be a constant 24-hour watch on a trip like this, but we are looking upon it as a pleasure jaunt. We are headed about 200 miles west of Catalina, where we expect to meet the trade winds to carry us to the Marquesas Islands, a small group in the South Pacific, a distance of 3,800 miles. The first lap is probably the most hazardous of the entire trip."

The elder Westrem is just as enthusiastic about the trip as his two sons. Despite the fact that he is now approaching his sixtieth birthday, he is as active as most men half his age.

Angry Wife: "The night before last you came home yesterday. Last night you came home to-day. If you come home to-morrow to-night there's going to be a real row!"

Four-fifths of England's forests were depleted during the World War.

HOME CORNER.

My Creed.
However meagre be my worldly
wealth,
Let me give something that shall
aid my kind.

A word of courage or a thought of
health,
Dropped as I pass for troubled
hearts to find.

Let me tonight look back upon the
span
'Twixt dawn and dark, and to my
conscience say,
"Because of some good act to best
or man
The world is better that I lived
to-day."

HOME HELPS.

Zink table tops can be cleaned by
scouring with a stiff paste made of
coal oil and baking soda. Wash
thoroughly with hot water.

A lump of sugar added to the
rinser water after washing soft
silks, will take away the extreme
limpness.

To mend a tear invisibly, turn the
garment to the wrong side and
smear the tear several times with
the white of an egg. Spread a small
piece of strong material of the same
colour over the place and press it
until it sticks, then press with hot
iron. This patch will stand wash-
ing without shifting.

JOKES.

At an evening party a woman
was describing how she had a quar-
rel with her husband, but had made
it up, and to commemorate the
event had planted a sapling.

"There you see," whispered one
wife to her husband, "If we had
done that, what a splendid avenue
of trees we should have by this
time."

"No," she agreed, "but I mean
when we are married."

Haiches.

"What a large family you have,
Mrs. Jones," said an American
woman to an English lady.
"Yes'm, and the funniest thing is
that all the names begin with a
haiboh, There's Grace, Erbert, Eury
Ugh, Ubort, Arnold, Arrie, and
Etty—all except the last one, and
we had her named Pallice."

Local and General

Mr. and Mrs. F. Hopkins visited
friends in Turner Valley Monday.

Mrs. J. Sharp and son Lawrence
spent the weekend at Bowden.

Hall McCaskill was a Calgary
business visitor last weekend.

Mrs. Bartlett, of Blairmore, is
visiting at the home of Mrs. Mossop

Miss Wilda Laut spent the week-
end at the home of Dr. Kelso,
Edmonton.

The Miller family, which has
been living in one of the Stevens
houses, moved to Calgary last week.

Mrs. Collins is moving into the
house recently vacated by the Mil-
ler family.

Rev. S. R. Hunt was a visitor at
Bowden, attending Presbytery Meet-
ing, Wednesday of this week.

Mr. and Mrs. D. G. Goertzen and
young son George, of Herbert Sask.
are visiting at the home of the
former's sister, Mrs. H. J. Wall.

Mr. and Mrs. L. C. Spivey, of
Edmonton, were holiday weekend
visitors with friends and relatives
in town.

Mr. and Mrs. T. Mait left Wed-
nesday, on a recently purchased
1938 Pontiac, for a holiday at
Vancouver.

Mrs. M. N. Jones entertained a
few ladies Thursday evening last
in honour of Mrs. J. T. Davis, who
leaves shortly to join her husband
at Drumheller.

The Junior W.A. held a hike to
Hall's Coulee the other Saturday.
The youngest member, Ruth Currie
enjoyed herself as much as the
older ones.

Dick Roberts arrived in Cross-
field last week and will spend the
winter with his old friends here.
Mrs. Roberts has gone on to visit
friends in Saskatchewan.

Mrs. Ballam, Mrs. Hoover, Mrs.
E. Sharp and Mrs. Belshaw were
joint hostesses at a tea held at the
home of Mrs. Ballam in honour of
Mrs. J. T. Davis, who leaves shortly
to take up residence in Drumheller.

Two freight trains have gone
west to Cremona within the last
week. The one Wednesday had
between 20 and 30 cars. This
shows that the crop condition in
the west is splendid.

Mr. H. A. Wolegde and other
friends of Calgary visited at the
former's parents, Mr. and Mrs. W.
Wolegde, last Thursday, when they
celebrated their umpteenth birth-
days, which are both on the same
day.

IN other words, does it phod along
on old tubes? Does it sound weak
and poorly? There's no need for this
today when you can have a complete
radio "Check-Up" at little cost. It
includes not only an A-to-Z inspection,
but the cure for a flock of radio's
little ills such as loose connections,
dirty parts, and corrosion. Get our

TEACHING THE YOUNG IDEA

Your boy may not have exhibited any particular signs
of genius but, if he is a normal youngster, he shows a
healthy curiosity about things. He wants to know what is
going on around him and what it means.

His teacher will tell you that his craving for knowledge
is just as natural and healthy a sign as a good appetite. His
brain gets as hungry for information as his body for food,
and it is just as important that it should be satisfied.

Nothing you can give him will provide such a fund of
interesting and varied information as a newspaper. A good
newspaper is a potent stimulus to thought and development.
It is the history of today, covering every field of human
endeavor. You will find few teachers who do not read a
newspaper. They know its value in keeping a mind alert
and in tune with the times.

Give your family this important advantage. It means
so much to young and inquiring minds.
